

Ceramic Silkscreen Glass

About the production Ceramic Silkscreen Glass, the first process of production is using ceramic paint to print pattern on the glass through special design of screen stencil, and then melt the paint into the glass surface through tempering furnace. Afterward, Ceramic Silkscreen Glass with the feature of steady and non-fading color, as well as different kinds of varied patterns is finally made.

Cautions

- Ceramic Silkscreen Glass is not allowed to cut after the production, so make sure the size and form while processing the order.
- Please reserve production time if your printing color requested mix paints separately, or the printing screen stencil had to produce separately. Because it will extend and spend more production time.
- The printing side is inward when applied on the curtain wall or windows.
- The printing style is single side printing.
- Please design and request the screen printing of skidproof in advance. It needs to construct separately.

*Some types of glass has the condition limit when printing processing. Please [Contact Us](#) for detail information.

Characteristics

1. **Variety Colors and Patterns:** There are many options for colors and patterns. We also able to customize pattern in accordance to your requested design for creating the unique and aesthetic feeling in the space design.
2. **Durability, wear proof, and water proof:** Ceramic Silkscreen Glass has better ability of durability, wear proof, and water proof than normal glass printed with pigments.
3. **Against dazzling, mitigate with the western exposure or the strong and direct sun light:** Ceramic Silkscreen Glass can reduce the dazzle of glass by its part printing. Besides, it has the mitigated effect with the western exposure or direct sunlight due to its sequence of part printings.
4. **Safety:** Ceramic Silkscreen Glass has enhanced treatment. It increases the toughness and improves safety.

Stanley gives glass a whole new life

Applications

- Curtain wall of building.
- Glass and window of the shop, house, school, etc.
- The graphic glass of interior partition.
- Auto glass, electrical glass.
- Furniture and art glass.
- Interior skidproof floor, boards of stairway. (The capability of skidproof must construct separately, please tell in advance if you need.)

Specification

Thickness(mm) Max Size(mm × mm) Min Size(mm × mm)

5 ~ 19 1220 × 2438 300 × 300

* If you have any other special size requirements, please [contact us](#).
